EDUCATION

California State University, Fullerton

Bachelor of Science in Computer Science

August 2024 – May 2027

Fullerton, CA

EXPERIENCE

Game-Dev Lead

Association for Computing Machinery

Fall 2025 – Summer 2026

Fullerton, CA

- Managed a division within a 2,500+ member organization, overseeing operations and conducting interviews.
- Led bi-weekly video game development workshops teaching game engine fundamentals across multiple engines.

Sales Advisor

Best Buy

August 2024 – January 2025

Fullerton, CA

- Understood various computer systems while developing communication, teamwork, and accountability skills.

Volunteer Programmer

Hikari3.ch

May 2023 – June 2025

Remote

- Co-founded an alternative online image board, contributing to UX design and managing 15,000+ posts.
- Developed mobile-focused features using JavaScript while collaborating with programmers across timezones.

PROJECTS

3D Game Engine

| *C++, OpenGL, GLSL* |

May 2025 – February 2026

- Developed a custom 3D game engine in C++ using OpenGL for rendering and GLSL for shaders.
- Implemented core engine features such as rendering pipelines, input handling, and window management.
- Implemented advanced lighting techniques such as Phong shading and Blinn-Phong for realistic rendering.

Rougelike Game

| *C#, Unity, Steam API, HLSL* |

August 2022 – September 2024

- Studied the Steam API to understand backend integration for game distribution and adapt to feedback.
- Programmed a modular upgrade system that allows for easy feature additions and future expansions.
- Implemented a Finite State Machine to improve code quality, streamline processes, and enhance maintainability.

AR-Companion Application

| *C#, iOS, OpenAI API* |

April 2025

- Programmed an AR companion that responds to commands using the OpenAI API for natural interactions.
- Ported the system to iOS devices, enabling immersive low-latency conversations with optimized performance.

Operating System Game

| *C, x86_64 Assembly, Docker, Make* |

October 2025

- Developed a pseudo operating system in C to run an arcade game, providing a smooth playable environment.
- Packaged the system as an ISO for USB or emulation, enabling easy play on real or virtual hardware.

TECHNICAL SKILLS

Languages: C/C++, C#, x86_64 Assembly, Python, Lua/Luau, SQL, JavaScript, HTML/CSS

Developer Tools: Git, Docker, VS Code, Visual Studio, TensorFlow, IntelliJ, vim

Libraries: pandas, NumPy, Matplotlib

INTEREST

Video games, Graphics programming, Arts, Guitar, Deepwoken, Arch Linux, Thinkpads, Esolangs
